

Cycling GPS App

1) What are needs in community? What needs to change? What can be improved?

better health and more fitness

more people outside

more cycling trails

also more driver awareness of cyclist

2) I've learned a lot in Java! what have I accomplished?

move bike lanes

make roads nicer

make more connected trails

need to widen roads

move bike racks

make easier ways to access places

and

address needs of community?

have program that takes you on routes w/ trails and bike lan

↳ make route wanted on computer could be used on phone?

different modes for app

GPS

build route +

online

saved routes

offline

favorit routes

home

settings

diff. modes

this side requires WIFI or Data

GPS

↳ from ^{current} location be able to put in new location

↳ build route from the 2 points

↳ many have different route options (like Google)

↳ be able to save route

↳ flat

↳ hills

↳ fastest

↳ least traffic

build route

↳ you manually build your route

↳ you can save the route

saved routes

↳ view saved routes

↳ "Pin" saves route

↳ will have map & directions

/ favorite routes

↳ of all the saved routes marked as favorite

Setting Up Maps

Set up Billing

Create a Project

Enable Maps API

Set up Credentials

API API Manager

Credentials

Credentials OAuth consent screen Domain verification

Create credentials Delete

Create credentials to access your enabled APIs. Refer to the API documentation for details.

API keys

<input type="checkbox"/>	Name	Creation date	Restriction	Key	
<input type="checkbox"/>	API key 1	May 15, 2017	Android app	AlzaSyBJUuzxwQtYJSXkcA_B3-0N2s7J11327Fs	 

New App Checklist

1. Create Blank Activity App ✓

2. Edit Build.gradle ✓

3. Edit Android.manifest

- meta for Google Services ✓

- meta for API Key ✓

- permissions for:

internet, network state and write external storage

- meta for OpenGL ✓

```
apply plugin: 'com.android.application'
```

```
android {  
    compileSdkVersion 25  
    buildToolsVersion "25.0.3"  
    defaultConfig {  
        applicationId "com.example.a19cpeterson.firstmap"  
        minSdkVersion 22  
        targetSdkVersion 25  
        versionCode 1  
        versionName "1.0"  
        testInstrumentationRunner "android.support.test.runner.AndroidJUnitRunner"  
    }  
    buildTypes {  
        release {  
            minifyEnabled false  
            proguardFiles getDefaultProguardFile('proguard-android.txt'), 'proguard-rules.pro'  
        }  
    }  
}  
  
dependencies {  
    compile fileTree(dir: 'libs', include: ['*.jar'])  
    androidTestCompile('com.android.support.test.espresso:espresso-core:2.2.2', {  
        exclude group: 'com.android.support', module: 'support-annotations'  
    })  
    compile 'com.android.support:appcompat-v7:25.3.1'  
    compile 'com.google.android.gms:play-services:10.2.4'  
    testCompile 'junit:junit:4.12'
```

```

<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    package="com.example.a19cpeterson.firstmap">
    <uses-feature
        android:glEsVersion="0x00020000"
        android:required="true">
    </uses-feature>
    <application
        android:allowBackup="true"
        android:icon="@mipmap/ic_launcher"
        android:label="First map"
        android:supportsRtl="true"
        android:theme="@style/AppTheme" >
        <meta-data

</manifest>

```

Adding a Map Fragment

Edit activity_main.xml

```
<fragment xmlns:android="http://schemas.android.com/apk/res/android"  
    android:id="@+id/map"  
    android:layout_width="match_parent"  
    android:layout_height="match_parent"  
    android:name="com.google.android.gms.maps.MapFragment"/>
```

```
<?xml version="1.0" encoding="utf-8" ?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:id="@+id/activity_map"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:paddingBottom="@dimen/activity_vertical_margin"
    android:paddingLeft="@dimen/activity_horizontal_margin"
    android:paddingRight="@dimen/activity_horizontal_margin"
    android:paddingTop="@dimen/activity_vertical_margin"
    tools:context="com.example.a19cpeterson.firstmap.MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!" />

    <fragment xmlns:android="http://schemas.android.com/apk/res/android"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:name="com.google.android.gms.maps.MapFragment" />

</RelativeLayout>
```
